PERSONAL PROJECTS

JobList

JobList is a series of web platforms for specialized job boards. At the moment, there are two websites being worked on - frontend and 3D. Easy to use, these websites can help recruiters seek new talent in their field of work, and help job seekers search and find openings that tick their criteria.

Technologies:

Typescript, NextJS, ChakraUI, react-hook-form, Express, Prisma, Stripe, etc.

RSSave

RSSave is a RSS feed reader app. With its help, the user can add any RSS feed URL and see the articles distributed through that feed. The user can group the feeds into different "bundles", but also add different articles to "Favorites" for reading later.

Technologies:

React Native, Expo

Details and other projects can be found here - deveugen.com/projects
